

## Testimonials Hessle Mount School 2011

“During the four years our son has attended Hessle Mount we have watched his self confidence, maturity and knowledge grow out of all recognition. We have to remind ourselves that he is only just 8 years old. He loves school. He has such respect and genuine affection for all the staff. We can only put this down to the way he has been welcomed, stretched and nurtured from day one onwards.”

Mr and Mrs Mould

“My three children have attended Hessle Mount School and I don't feel I could have given them a better start in life. From the children being small, they have been so well cared for, which is really important when you are sending your children off for the first time. I really like the traditional values that Hessle Mount stands for and expects from the children. Learning whilst having fun, sharing ideas and teaching the children to be kind and well mannered to everyone in the school.

I have always been very happy with the standard of teaching and education they have achieved at Hessle Mount, which has equipped my children with the knowledge and confidence to move on to their next school . All three of my children have been very happy here and have come through with a solid education and lots of fond memories of their time at Hessle Mount.”

Mrs O'Callaghan

“Hessle Mount School has provided a unique and happy environment for my children's education.

The warm family atmosphere gives the children the security required at such a young start in life.

The school takes an interest in each individual child which builds their confidence in readiness for their future education.

I am so proud that my children have received the benefit of not only an excellent education but also have been taught kindness, caring and sharing with others.

They have been and continue to be extremely happy and secure at Hessle Mount School.

Thank you”

Mrs Hatfield

Hessle Mount has a delightful family atmosphere. Every child feels known and valued, develops confidence and is encouraged to treat others with respect. It has given our son a wonderful start to his education. Every day he looks forward to going, and comes home bursting with news about what he has learned. His teachers have fostered and developed his interest in a wide range of subjects, as well as introducing him to new ones and providing the essential grounding in reading, writing and mathematics. He will start his new school full of confidence and keen to learn more - exactly what a parent hopes for from their child's first school.
